60/30 CLASSIC STEEL SHELVING

The 60/30 Classic Steel Shelving system is the essence of many years of experience and success. This flexible product concept has evolved over the years and the modular structure and the large number of standard components ensure ideal room utilization and rational accommodation of all relevant functions. In addition the flexibility of the system allows a variety of individual solutions which our design teams bring to life for the individual library.

You will find all our standard products in this overview. For additional inspiration we invite you to visit our website, where you can find project inspiration from our latest projects around the world.

The 60/30 Classic Steel Shelving system is shown in many creative configurations mixed with special developments such as round shelving with seating benches and castors, integrated youth corners with tables and chairs etc. Our broad portfolio of library furniture provides endless possibilities. Please contact our professional sales teams for inspiration.

WOOD FROM SUSTAINABLE MANAGED FORESTRY

We are committed to increasing the share of sustainable raw wooden material in our products and thereby support responsibly managed forests – for a better world.

Governments and local authorities are specifying the supply of legal and responsibly sourced wood in their procurement policies.

We have invested in a Chain-of-Custody Multi-site certificate (FSC-C 144988), issued by FSC®, which documents, that we can offer wood from responsibly managed forests. FSC (Forest Stewardship Council) is an international labelling scheme, that documents that FSC labelled products originate from sustainable forestry.

Working with certified suppliers, we can now offer all painted and veneered components as fully FSC Mix certified (noted in this document for each wooden product, which is FSC-certified).

What is sustainable managed forestry?

According to the FSC, forests, managed according to their principles and criteria, mean fair conditions for workers, respect for indigenous communities and local populations as well as strict environmental controls.

The FSC label guarantees that the trees that are harvested are replaced or allowed to regenerate naturally.

The FSC label also guarantees that all the wood is tracked from the forest to the store. Every link between the forest and the consumer is certified to make it clearly identifiable which wood is from sustainable forestry and which is not.

TECHNICAL SPECIFICATIONS

GENERAL SPECIFICATIONS

DIMENSIONS

Dimensions of complete bays in available modules and heights can be found in each catalogue section which include complete configurations. See index page for overview.

MOUNTING TOLERANCES

The tolerances of the increments of the column limit the number of shelving bays, which can be built together. Generally the tolerances permit up to 10 successive bays. Above 10 bays it is advised to continue with a starter bay.

MAXIMUM LOAD

Steel top shelf - max. load of 25 kg.

Steel shelf with backedge - max. load of 80 kg.

Round steel top shelf - max. load of 25 kg.

Round steel shelf with backedge - max. load of 30 kg.

Round steel shelf with backedge and shelf strengthener - max. load of 80 kg.

Wooden top shelf - particleboard - max. load of 25 kg.

Wooden shelf with backedge - block board - max. load of 80 kg.

Steel browser with pull-out frame - max. load of 40 kg

MOBILE SHELVINGS/CASTORS

Only double-sided shelving units with a max. height of 152 cm and maximum 3 bays can be mounted with castors. Castors are available with or without brakes. Max. load of 120 kg per castor, max. load of 100 kg per hidden castor.

EXTENSIONS FOR UPRIGHTS

are used to increase the capacity. Enables an extra layer of shelves. Available for single- and double-sided uprights. Can be used for uprights of max. height of 229 cm.

STABILITY

All uprights are provided with adjustable feet that can be adjusted even when the system is loaded. Single-sided uprights are supplied with anti-topple brackets.

ROUNDED EDGES

All storage units and brackets have rounded edges.

BROWSERS

It is important to remember the following, when installing browsers in a shelving system:

- Browsers without tubes are meant for low medias with a maximum height of 20 cm, meaning they are not suited for e.g. picture books, as they may tip over the edge. If you wish to use store/display tall medias in browsers, then it is recommended to use single browsers with tubes, 20 cm in height and to place the books as far back as possible.
- The foot of the upright must minimally be the same depth as the browser, meaning that a 30 cm deep browser must only be installed on a 30 or 40 cm deep upright and a 40 cm deep browser on a 40 cm deep upright.
- We recommend that all shelving systems with browsers are either fixed to the floor or wall.
- Ensure that children do not play/crawl/hang on the shelving system.
- The maximum weight for each pull-out browser is 45 kg.

ASSEMBLY

No special fittings or tools are needed.

TECHNICAL SPECIFICATIONS

STEEL COMPONENTS

STEEL COMPONENTS

are powder coated with standard polyester based powders that secures high UV resistance. Powders comply with EN 45545 (fire protection - similar to DIN 4201). Thickness of the coating is 60-80 my. The powder used includes no triglycidylisocyanurate (TGIC), no heavy metal-containing pigments such as lead and cadmium and no volatiles

Steel components are not treated with any biocidal products.

Antibacterial equipping of surfaces upon request.

STEEL UPRIGHTS

are made of steel square tubes. The freestanding single- and double-faced uprights are available in two strengths which are recommended based on load carrying requirements. Choose between configurations with either 60 x 30 mm or 80 x 30 mm external dimensions. The upright is 2 mm thick and the welded foot is 3 mm thick. The uprights allow a wide range of shelves and other functions to be mounted in a row of punched holes with a distance of 25 mm. The uprights are provided with plastic caps to close the tube ends. The uprights are also provided with adjustable feet, adjustable to a max. of 25 mm.

STEEL WALL STRIPS

are made of 2 mm steel coils. The uprights allow a wide range of shelves and other functions to be mounted in a row of punched holes with a distance of 25 mm.

STEEL CROSSBARS

are made of 1.4 mm sheet steel. The crossbars are with hooks for easy connection to uprights. The uprights are connected with 2 crossbars for each bay. The top and bottom crossbar have an opening/groove to allow back panels to be fitted to the uprights without the use of special fittings or tools. A third crossbar is used on first and every third 229 and 259 cm high shelving bay. For heavy load it is recommended to use 3 crossbars in each bay. The third crossbar will be mounted at a fixed position using the slots at height 98 cm above the floor.

STEEL CROSSBARS FOR ROUND SHELVING

are made of 20 x 70 x 2 mm steel square tubes. The crossbars are with connection fittings for easy connection to uprights. The uprights are connected with 2 crossbars for each bay.

STEEL BRACKETS

are made of 1.4 mm sheet steel.

STEEL SHELVES/BROWSERS/CABINETS/PULL-OUT SHELVES

are made of 0.9 mm sheet steel. The flat steel shelves have a 25 mm high front edge. The sloping steel shelves are bent in a way so they have a stopper to prevent magazines from sliding off. Flat steel shelves can be mounted in a sloping position by changing brackets.

STEEL PLINTHS

are 60 mm high and made of 0.9 mm sheet steel.

LONDON STEEL PLINTHS

are made of 0.9 mm sheet steel over 1 and 2 bays and 1.5 mm sheet steel over 3 bays.

PERFORATED STEEL END PANELS

are made of 1.4 mm sheet steel. The perforations are Ø4.5 mm.

LONDON STEEL END PANELS AND TOPS

are made of 1.4 mm sheet steel with a 30 mm wide front edge.

TECHNICAL SPECIFICATIONS

WOODEN COMPONENTS

DENSITY

Particle board has a density of 600-700 kg/m³

Block board has a density of 602 m³ (+/- 2 %)

MDF has a density of 700 kg/m³ (+/- 5-7 %)

PAINTED WOODEN COMPONENTS

are made of MDF (medium density fibre board) which is painted with acid lacquer. Standard components have gloss 20 - 30, except for shelves for Expo that have gloss 60 - 70.

PAINTED PANELS

are made of 19 mm MDF. The wooden panels are supplied with fittings and hooks for easy connection to uprights.

PAINTED DISPLAY PANELS

are made of 22 mm MDF. The wooden panels are supplied with fittings with hooks for easy connection to uprights.

PAINTED LONDON WOODEN PANELS AND TOPS

are made of 30 mm MDF. Along the vertical edges of the panel a flat aluminium profile is attached. The aluminium profile is powder coated in the specified colour. The profiles are mounted on the front edge of panels using visible euro screws which are powder coated in the specified colour. The end panels and top are attached to the shelving using steel brackets.

PAINTED BACK PANELS

are made of 12 mm MDF.

PAINTED TOP SHELVES

are made of 22 mm MDF.

PAINTED SHELVES EXPO

are made of 22 mm MDF with special PU paint to increase robustness.

VENEERED WOODEN COMPONENTS

are mainly lacquered with UV-lacquer.

VENEERED PANELS

are made of 19 mm particleboard and are veneered with 0.6 mm veneer. All vertical and horizontal edges have a 2 mm veneer edge. The wooden panels are supplied with fittings and hooks for easy connection to uprights.

VENEERED DISPLAY PANELS

are made of 22 mm MDF and are veneered with 0.6 mm veneer. All vertical and horizontal edges have a 2 mm veneer edge. The wooden panels are supplied with fittings with hooks for easy connection to uprights.

VENEERED BACK PANELS

are made of 12 mm particleboard and are veneered with 0.6 mm veneer.

VENEERED SHELVES

are made of 22 mm block board and are veneered with 0.6 mm veneer. The front and back edges have a 2 mm veneer edge.

VENEERED TOP SHELVES

are made of 22 mm particleboard and are veneered with 0.6 mm veneer. The front and back edges have a 2 mm veneer edge.

VENEERED CORNER SHELVES

are made of 22 mm particleboard and are veneered with 0.6 mm veneer. The straight edges have a 2 mm veneer edge and the front has a 1 mm wooden edge strip.

TECHNICAL SPECIFICATIONS

GLASS COMPONENTS

GLASS COMPONENTS

GLASS END PANELS

are made of hardened frosted glass. Satimat 10 mm with straight mat facet edges.

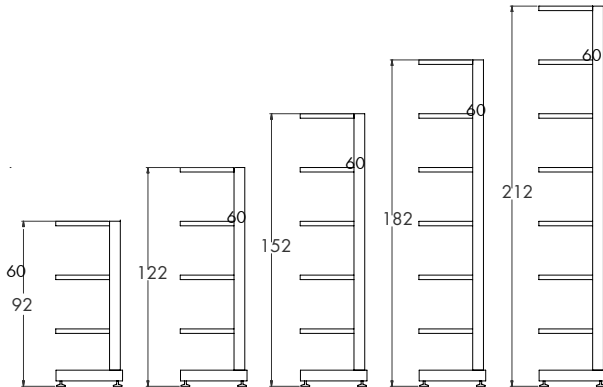

DIMENSIONS

60/30 CLASSIC

Please find important dimensions below, configurations can be found on page 26.

HEIGHTS

The shelving system is available in 5 heights; 92, 122, 152, 182 and 212 cm. Heights include adjustable feet (max. 2.5 cm). The shelves are adjustable in 2.5 cm increments.

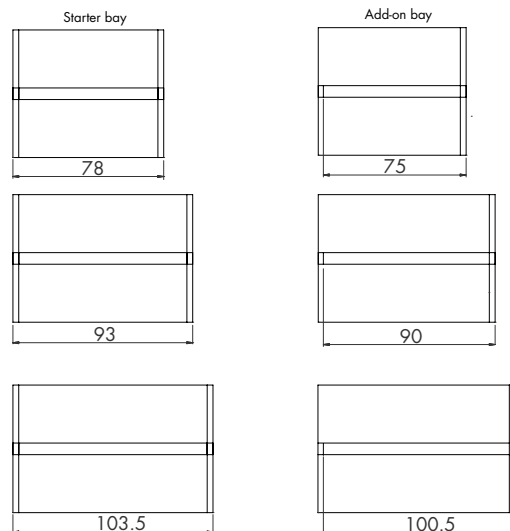

WIDTHS

The bays are available as starter and add-on bays. A starter bay has two uprights and an add-on bay has one upright.

60/30 CLASSIC

SINGLE-SIDED - WITH SHELVES - WITHOUT TOP SHELF

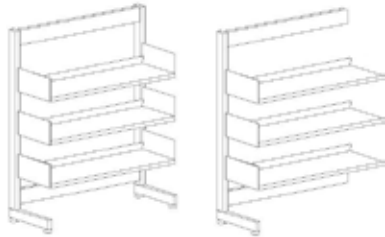

Complete shelving system with uprights, crossbars, shelves, brackets, fittings and wall securement. Shelves are steel shelves with backedge. Number of shelves are calculated for optimal shelf spacing for fiction. A starter bay is delivered with one right and one left bracket per shelf. An add-on bay is delivered with a double bracket per shelf, which places the shelves in the same height as that of the starter bay.

Height 92 cm (2 shelves)

60/30 CLASSIC

DOUBLE-SIDED - WITH SHELVES - WITHOUT TOP SHELF

Complete shelving system with uprights, crossbars, shelves, brackets and fittings. Shelves are steel shelves with backedge. Number of shelves are calculated for optimal shelf spacing for fiction. A starter bay is delivered with one right and one left bracket per shelf. An add-on bay is delivered with a double bracket per shelf, which places the shelves in the same height as that of the starter bay.

Height 182 cm (5 shelves on each side)

60/30 CLASSIC WITH LED

The following pages will show basic configurations of the 60/30 Classic Steel Shelving system with LED based on 60/30 upright installations.

60/30 CLASSIC WITH LED

SINGLE-SIDED - WITHOUT TOP SHELF AND WITH LED LIGHTING ON INTERMEDIATE SHELVES

Complete shelving system with uprights, cable channels, crossbars, steel shelves with backedge and LED lighting (see page 160 for details on LED lighting), brackets, fittings and wall securement. Cabling from bottom (cabling from above is an option, contact sales). Number of shelves are calculated for optimal shelf spacing for fiction. The LED light is placed underneath each shelf and the cable channel is placed on the left side of the bay. A starter bay is delivered with one right and one left bracket per shelf. An add-on bay is delivered with a double bracket per shelf, which places the shelves in the same height as that of the starter bay.

Height 92 cm (2 shelves and 1 LED light)

Please contact Sales for prices on 60/30 configurations with LED.

60/30 CLASSIC WITH LED

SINGLE-SIDED - WITHOUT TOP SHELF AND WITH LED LIGHTING ON INTERMEDIATE SHELVES

Complete shelving system with uprights, cable channels, crossbars, steel shelves with backedge and LED lighting (see page 160 for details on LED lighting), brackets, fittings and wall securement. Cabling from bottom (cabling from above is an option, contact sales). Number of shelves are calculated for optimal shelf spacing for fiction. The LED light is placed underneath each shelf and the cable channel is placed on the left side of the bay. A starter bay is delivered with one right and one left bracket per shelf. An add-on bay is delivered with a double bracket per shelf, which places the shelves in the same height as that of the starter bay.

Height 182 cm (5 shelves and 4 LED lights)

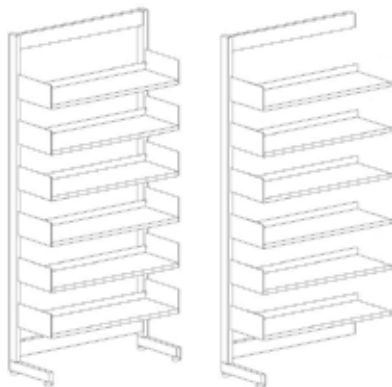

Please contact Sales for prices on 60/30 configurations with LED.

60/30 CLASSIC WITH LED

DOUBLE-SIDED - WITH TOP SHELF AND LED LIGHTING ON TOP AND INTERMEDIATE SHELVES

Complete shelving system with uprights, cable channels, crossbars, steel shelves with backedge and LED lighting, top shelves with LED lighting (see page 160 for details on LED lighting), brackets and fittings. Cabling from bottom (cabling from above is an option, contact sales). Number of shelves are calculated for optimal shelf spacing for fiction. The LED light is placed underneath each shelf and the cable channel is placed on the left side of the bay. A starter bay is delivered with one right and one left bracket per shelf. An add-on bay is delivered with a double bracket per shelf, which places the shelves in the same height as that of the starter bay.

Height 92 cm (1 top shelf, 2 shelves and 2 LED lights on each side)

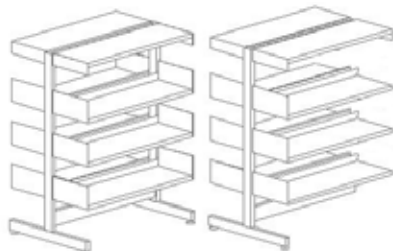

Please contact Sales for prices on 60/30 configurations with LED.

80/30 CLASSIC STEEL SHELVING

The following pages will show basic configurations of the 60/30 Classic Steel Shelving system based on 80/30 upright installations. The wider construction of this upright allows for greater total weight and also a taller construction.

80/30 CLASSIC STEEL SHELVING

SINGLE-SIDED - WITH TOP SHELF

Complete shelving system with uprights, crossbars, shelves, top shelf, brackets, fittings and wall securement. Shelves are steel shelves with backedge, top shelf is steel shelf without backedge. Number of shelves are calculated for optimal shelf spacing for fiction. A starter bay is delivered with one right and one left bracket per shelf. An add-on bay is delivered with a double bracket per shelf, which places the shelves in the same height as that of the starter bay. Please note that standard end panels do not fit on 80/30 steel shelving and must be ordered specially, please contact customer service.

CLASSIC STEEL SHELVING - WALL

WITH TOP SHELF

Complete shelving system with wall strips, shelves, top shelf, brackets and fittings. Shelves are steel shelves with backedge, top shelf is steel shelf without backedge. Number of shelves are calculated for optimal shelf spacing for fiction. A starter bay is delivered with one right and one left bracket per shelf. An add-on bay is delivered with a double bracket per shelf, which places the shelves in the same height as that of the starter bay. Please note that standard end panels do not fit on 60/30 wall steel shelving and must be ordered specially, please contact customer service.

Height 172.5 cm (5 shelves + top shelf)

On the following pages you will find a selection of 60/30 Expo configurations including prices and lists of components included in the specific configuration. Please note that other configurations are available.

60/30 Expo is available as double-sided over a maximum of 3 bays. It consists of components, which are used for the 60/30 Classic shelving configurations along with a series of specific 60/30 Expo components. 60/30 Expo is made of steel uprights, painted wooden shelves and acrylic display shelves. The steel uprights and painted wooden shelves are available in all our standard colours. Note that wooden shelves cannot be placed next to an acrylic shelf and wooden shelves cannot be placed in front of back panels.

With many years of expertise in understanding the role and the function of modern libraries, we have designed and supplied a broad variety of light solutions to our shelving systems. Therefore we recommend you contact us to get an idea of our special light offering.

Depending on the architecture of the library, the use of daylight and other light sources we have the competencies to offer you special solutions that support the function of the library.

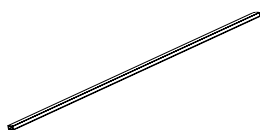

The LED lighting strips are mounted underneath each steel shelf to add light to the shelf below. You can find complete shelving configurations on page 40. Below you will find an overview of all components used in a configuration with LED lighting. It is also possible to construct your own shelving using the standard and special constructed components for LED lighting, contact Sales for further details.

Warm white LED lighting

Selfadhesive. 3000 kelvin. 12V. 4.8 W per meter. Energy efficiency A+. 60 diodes per meter. Light output (lm) 4.1 per meter.

Steel shelves

The LED lighting is mounted underneath standard steel top shelves and steel intermediate shelves with backedge. See pages 66-73.

The Book LED lighting armature can be fitted on wooden top shelves and can be mounted over 1, 2 and 3 bays by use of connect fittings. Continuous runs also require connect fitting.

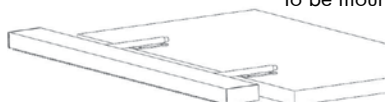

The armature is CE-approved and available in white and steel as standard. For other colours, please ask customer service.

Armature

Model showing 2 bearing arms incl. light tube and louvre. Armature housing in aluminium.

Standard bearing arms

To be mounted on top of top shelf.

Front edge bearing arms

To be mounted on frontedge of predrilled top shelf/top plate (special request)

LIGHTING

BOOK LED LIGHTING

Below you will find a list of products needed when ordering lighting for 1, 2 or 3 bays. For 4 or more bays, you must use a combination of the armatures for 1, 2 or 3 bays by connecting the armatures with a connect fitting. Eg. for 10 bays, you can either use 5 x 2 bays (with 4 connect fittings) or 3 x 3 bays and 1 x 1 bay (with 3 connect fittings).

60/30 CLASSIC ROUND STEEL SHELVING

CONFIGURATIONS - WITH SHELVES - WITHOUT TOP SHELF

Complete double-sided shelving system with uprights, crossbars, shelves, brackets, galvanized safety clip and fittings (the safety clip is available in standard steel colours and can be ordered separately, see page 175). Shelves are rounded steel shelves with backedge. Number of shelves are calculated for optimal shelf spacing for fiction. A starter bay is delivered with one right and one left bracket per shelf. An add-on bay is delivered with a double bracket per shelf, which places the shelves in the same height as that of the starter bay.
