

UNIFLEX

SHELVING SYSTEM

WE ARE LIBRARY PEOPLE®

UNIFLEX SHELVING SYSTEM

Functional, flexible and aesthetic

The Uniflex shelving system is a flexible system for easy assembly and has been designed for long time use and special demands in libraries, both in function and quality.

The sturdy shelving system with 30 x 30 mm perforated square tubing is ideally suited for use in high volume libraries as well as in public and school libraries. The design of the shelving systems with 25 mm increments allows for easy assembly and adjustment without use of specific tools.

The system offers two different visual and functional options: Uniflex-B is constructed to create an open, airy feel with the bottom shelf placed 230 mm above the floor. Uniflex-S is constructed as a high volume shelving system, with only 100 mm from floor to bottom shelf, taking full advantage of the height of the shelving system. It is ideal for large volumes often used in scientific libraries. You have the option of closing off the Uniflex-S with a bottom shelf with kickplate.

INNOVATIVE LIBRARY DESIGN

Unique library solutions

Since 1929, we have been pioneering libraries of all kinds all over the world. Today, we deliver our experience, expertise and creativity with a flexible system of high-quality products. The result is innovative library design.

Flexible and minimalist design. Contemporary and sustainable solutions. Various design expressions. Fixed and mobile units. Combined display and storage. Integrated search stations and touch screens. We are true innovators of modern library design.

LIBRARY SPACE

We design the room around the user experience

We work with the library as a creative space where we add ideas, experience, competence and of course furniture. Your project may be small or big, but our aspiration is always to make a better library that people will use and enjoy. Facilitated by our in-depth understanding of library functionality, new thinking is our foremost contribution.

Use zoning to create rooms and easy navigation. Integrate lighting, signage, graphics and other components for a seamless finish.

Encourage "quick picks" with inspiring displays. Create tempting reading areas and easy browsing with freestanding and integrated browsers.

FACTS

Product details

The Uniflex shelving system is available as single- and double-sided in a variety of standard heights, widths and depths. Uniflex-S has the option of increasing the height of the bays (from standard 2250 mm up to 3675 mm in total). Shelves are available in both steel and wood and it is possible to add a wide variety of panels and functional components to create the right functionality for your library.

The Uniflex shelving system is built up around frames of 30 x 30 mm perforated square tubing with 25 mm increments. The shelves are almost flush with the frame, the distance between the front edge of the frame and the front edge of the shelf is approx. 5 mm.

DIMENSIONS

- Heights:
1100/1500/1750/1860/2050/
2250/2575 mm
Increased height on Uniflex-S
H2250 mm: 2575/2975/3325 mm
- Widths:
500/750/900/1000 mm
- Depths:
250/300/350 mm
